

Lectora X.4 Available Now!

Turning cutting edge technology into bleeding edge eLearning

Lectora continues to empower eLearning developers and subject matter experts with all the tools to create professional and interactive eLearning. Now, with the latest release of Lectora X.4, anyone from novice to pro can develop more engaging content, published to a variety of formats with ease. Deploy content to mobile and tablet devices, create crisp audio recordings, excite learners with Flash games, or meet 508 compliance standards with Lectora X.4.

New Features Include:

- ▶ **HTML5 Media Support for Mobile Devices:** Conveniently publish media with a single click to operate on virtually any device, whether it's a PC, Mac, iPhone, iPad, or Android 2.2. Utilize this feature with video in MP4 format, audio in MP3 format, or integrate iPhone specific media types like M4V video or M4A audio into your courses.
- ▶ **Tablet and Mobile Templates:** Deliver eLearning courses to learners on the go by utilizing dozens of new tablet and mobile templates that seamlessly publish content to mobile and tablet devices such as the iPad and iPhone.
- ▶ **508 Compliance Improvements:** Lectora makes it easier for screen readers to read questions and forms by providing more seamless course accessibility for those with disabilities.
- ▶ **New Flash Games:** Instantly engage learners with a variety of new creative and fun Flash games, including:
 - Golf Hole in One
 - Basketball
 - Soccer Penalty shot
 - Bowling
- ▶ **F4V Video Support:** Get stunning video quality with lower file sizes with the support of the latest video technology, F4V video, which is now automatically used when converting video to Flash format.
- ▶ **Initially Visible Property for Questions and Group Objects:** Questions and Group Objects now have the "Initially Visible" property which applies to all of the objects within the question or group.
- ▶ **Question Feedback Improvements:** Easily create interactivity or branching scenarios based on a user's response to a specific question. Set a text block to the feedback from the question, or run an action as feedback for a right or wrong answer.

New Lectora Inspire Features

▶ **Improved Audio recording**

- Develop high-quality audio recordings with smaller file sizes with brand new audio recording capabilities.

▶ **Camtasia for Lectora:**

- **Speech-to-Text Transcription** - Automatically turn what you say directly into captions by utilizing Windows Speech Recognition. Saves time and effort!
- **Enhanced Captioning Support** - Easily create 508 compliant closed and open captions, and help viewers with hearing disabilities or language barriers better understand the content in your video.
- **Import/Export Captioning Files** – Conveniently export your audio so you can more easily transcribe it into a caption file, and then import the transcription back into your video.

▶ **Flypaper for Lectora:**

- **Multi-touch support** - Slide, swipe, pan, zoom and rotate all components on your multi-touch enabled monitor for greater interactivity and fun.
- **Video Feed** -Conveniently stream video feeds from various news sources and even specify your own FLV, MOV or MP4 feed.
- **Print Button** - Print the visible contents of the screen (or just the visible Components you specify) with the simple click of a button.
- **International Language Font Options** - Break down language barriers by communicating with learners through Arial font in Japanese, Simplified Chinese, Spanish, French, German, Italian and Portuguese.
- **Enhanced SWF Playback** – Enjoy improved playback performance for Single SWF file output.
- **Various Improvements for Better eLearning** – Experience smoother performance and seamless development with more than 25 improvements throughout Flypaper such as web video search enhancements, file recovery improvements, performance upgrades, and much more.
